Resume

I have been interested in computers since childhood. Learned to write a program for the first time self-taught when I was in vocational school year 1 from writing a web page with HTML+PHP and learning JS+CSS to add features and beauty to the web page. before trying to write games with C++, DirectX, and CDX in the same year.

As for programming, most of them are hobbyists, writing out of personal needs for education or to reduce the workow and earn extra money. In addition, I also tried to use old computers to create servers, and learn to configure them such as Apache, Nginx, Node.js, Tor deep web, and Shoutcast. My freelance work some as shown in the table below.

Currently, I am still self-learning and am always open to new knowledge.

Education

Year	School	Comment
2543 (2000)	Grade 6, Phibun Prachaban School	
2546 (2003)	Mathayom 3, Wat Si Chan Pradit Secondary School
